

Who develops IQBID?

To create new services, develop and support them, we form working groups (teams) that work remotely through a specialized cloud service for team, project, and document management. This service was specially developed by us to solve everyday tasks. Anyone can take an active part in managing our projects and receive rewards for their work.

Strategic [management of IQBID](#) is carried out by a group of [managing investors](#) through [IQBID DAO](#).

The main contractor for IT infrastructure development, coding, and administration is [CFD Team](#).
